LED-LINE

LUMINOUS GUIDE LINE

weartronic by NICOMATIC

A PATENTED FRENCH TECHNOLOGY

Move forward safely

LED-Line is a luminous guide line designed to support intervention teams in environments where visibility becomes critical.

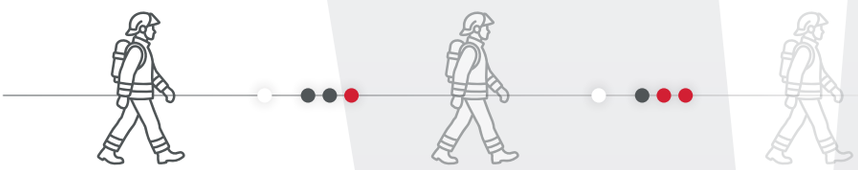

Deployed as teams move forward, it creates illuminated reference points, enabling them to:

- track their progress over 50 metres;
- identify the way in and the way out;
- measure distances;
- send a visual warning signal in case of emergency.

A visible reference when visibility disappears.

In smoke, darkness and complex environments, every reference point matters.

LED-Line turns the guide line into a true illuminated lifeline, **by your side throughout the intervention**.

50 metres | ±200° | IP67 | LED Colours
